Deadline for manuscript submissions:

closed (1 August 2019)

## **Message from the Guest Editors**

Dear Colleagues,

Natural resource management (both renewable and nonrenewable) has a long tradition in many disciplines. The perspectives have varied over time and between disciplines. For a long time, a major concern was the risk of depletion of nonrenewable resources. However, more recently, sustainable development has been replaced by "green growth" in many policies following a series of flagship reports by the World Bank, OECD, UNEP, etc. Finally, this has made various ministries of finance around the world recognize the green agenda.

Examples of such applications include but are not limited to:

- Devolved forest management balancing profitability and environmental concerns;
- Highly productive and sustainable catch fisheries and aquaculture;
- High-yielding sustainable agriculture;
- Profitable and sustainable ecotourism benefiting local stakeholders:
- Profitable mining (large- or small-scale) with limited negative environmental and social impacts.

# **Message from the Editor-in-Chief**

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
