Message from the Guest Editors

Dear Colleagues,

Net-zero carbon emissions by 2050 has become the latest target for governments and companies in tackling global climate change. Supply chains are a major producer of carbon emissions, generating nearly 60% globally. Developing a sustainable supply chain is an essential step in the transition towards net zero carbon.

This Special Issue aims to share new research to accelerating the transition to net-zero supply chains, and will thus contribute to the understanding of how digitisation, renewable energy, circular economy and green finance can promote sustainable supply chains. Research areas may include (but are not limited to) the following:

- Framework for developing Net-Zero supply chain;
- Tools to capture and quantify the carbon footprint along a supply chain;
- Sustainable finance and supply chain finance;
- Innovation and enterprise in sustainable supply chains;
- Embedding circular economy into supply chains;
- Digital technology powered sustainable supply chains;
- Renewable energy supply source adoption;
- Empowering, and engaging with, suppliers to decarbonise.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
