Message from the Guest Editors

Dear Colleagues,

The sustainable seafood movement has been working for two decades to improve fisheries and aquaculture through a variety of means to ensure, overall, a healthy ocean. However, after two decades, many of the issues originally identified (IUU fishing, human rights abuses, excessive environmental impacts, aquaculture escapes, lack of benefits to producers) still remain problematic. This lack of progress needs to be explored, and if current methods are deficient, then new approaches will be necessary. This Special Issue will address progress to date, evaluate current methods, and explore new approaches to ensure that we do not over-promise and under-deliver fisheries and aquaculture sustainability.

Dr. Michael Tlusty

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
