Deadline for manuscript submissions:

closed (30 June 2023)

Message from the Guest Editors

Ecosystems are increasingly recognized as natural capital resources that provide life support services with enormous scope and value. Our understanding of the production functions of different ecosystems is improving rapidly, with particular attention being paid to the potential the natural environment offers, especially extreme environments, where natural selective pressure gives life to organisms with unique and unexplored peculiarities. From bioremediation to the discovery of new antibiotics, the environment, and the organisms that populate it, research on such unimaginable resources and their use could be valuable for many sectors. However, while research is turning largely to bioresources, a systematic assessment of the extent and limits of various ecosystems is also essential for sustainable exploitation. In this context, this Special Issue, "New Advances in Ecosystem Services, Biodiversity, and Environmental Sustainability", will investigate the latest advances in the sustainable exploitation of different ecosystems and exploration of their potential.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
