Message from the Collection Editors

Dear Colleagues,

The United Nations 2030 Agenda for Sustainable Development establishes a series of sustainable development goals (SDGs) that are designing new sustainability policies and tourist destinations worldwide from the perspective of the environment, economic prosperity, equity, cohesion social and knowledge.

The development of sustainable tourism requires the achievement of specific goals and global involvement, based on its ability to widely penetrate society, educate and influence the adoption of new consumption and production patterns. However, a lack of understanding about certain necessary actions inhibits some progress in terms of sustainability. Critical awareness and understanding of the structural contexts of poverty and underdevelopment at a global level are required.

This Special Issue aims to address the understanding, impact and role of tourism in sustainability, as well as the benefits of its feedback in a circular approach, taking into account both types of influences induced and the conditions involved. The context of sustainable tourism development and a correct agenda are two factors that will be implemented in this Special Issue.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
