Message from the Guest Editors

The concept of sustainability in the food system is very complex because it does not only concern the food itself, but all phases of the process, from production to packaging, distribution and consumption patterns.

Achieving the goals of sustainability in the food system requires the joint effort of numerous actors, from agricultural producers to all components of the food chain, and from consumers to public institutions at different levels for the development of rules and the monitoring of their application.

The following topics are suggested for the Special Issue (but other topics that relate to the proposed subject will also be accepted):

- Globalisation of the food system and food security;
- Globalisation of the food system and geopolitical implications;
- Agribusiness and economic, social and environmental impact;
- Ethics and health in the agri-food system;
- Consumer behaviour and protection;
- From homologation of food systems to local food and short supply chains;
- Localised agri-food systems;
- The food system in the 2030 Agenda goals.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
