Message from the Guest Editor

Dear Colleagues,

Ensuring sustainability practices across supply chains in different industries has been a focus of research during the past decades. Many countries and companies prioritize such practices to reduce carbon emissions, use fewer fossil resources and more renewable resources, reduce waste, and improve labor conditions.

The barriers to developing and implementing sustainability practices, as well as the potentially effective and innovative solutions toward a more sustainable supply chain and logistics management are welcome. With the advent of recent technologies, such as the Internet of Things and Blockchain, the roles and impacts of technologies and innovative approaches in the identification and improving sustainability practices are critical.

This Special Issue invites authors to contribute to the research on impacts, barriers, and challenges, as well as solutions, innovations, and successful practices in Sustainable Supply Chain and Logistics Management.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
