Message from the Guest Editor

The rapidly growing number of research studies and business cases prove that sustainability considerations are attracting increased attention in the domains of operations and logistics, both in research and in practice. This is not surprising, as sustainable operations and logistics may contribute significantly to an overall sustainable development meeting the future generations' needs while taking economic, environmental, and social aspects into account. The aim of this Special Issue is to contribute to sustainable development by presenting innovative approaches and applications as well as empirical findings for integrating sustainability aspects into the operations and logistics sector.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
