Message from the Guest Editor

This Special Issue will focus on emerging photovoltaics as, for instance, organic and perovskite technologies. Much effort will be focused on the development of innovative manufacturing processes, architectures, and materials in order to develop a new generation of photovoltaic cells, taking into account simplicity, efficiency, and durability. We welcome original research papers on recent technical developments of Organic and Perovskite devices, components, and systems, as well as relevant reviews and case studies to show the future direction of new emerging photovoltaics. Topics of interest include but are not limited to the following: organic materials, polymers, perovskites, synthesis, process, efficiency, durability, elucidation of mechanisms, devices architecture, and tandem devices.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
