Science and Engineering, School  
of Environmental and Chemical  
Engineering, Shanghai University,  
Shanghai 200444, China

Deadline for manuscript  
submissions:

**closed (15 June 2023)**

### **Message from the Guest Editor**

Organic wastes such as human excreta, food waste, animal wastes, sewage sludge and emerging pollutants such as pharmaceuticals and personal care products, contain a lot of pollutants, but they also contain valuable substances. The incineration and pyrolysis methods of organic wastes involve very high investment and operation costs. The application of by-products from biological processes is not easy. Therefore, simple, practical, and economical technologies of organic waste treatment, recycling, and reuse should be given priority. This Special Issue aims to draw attention to the sustainable development of organic waste treatment, recycling, and reuse, and to promote the exchange of research that focuses on organic waste management.

The issue will cover (but is not limited to):

- The physical, chemical, biological and thermal treatment, recovery, and reuse of organic wastes
- The combination of organic wastes treatment and recycling
- The pretreatment of organic wastes
- By-product application of organic waste treatment
- Other emerging technology regarding the treatment, recovery, and reuse of organic wastes

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
