### Message from the Guest Editors

COVID-19 has caused an unprecedented crisis in all industries worldwide. Uncertainty in employment increased by the virus in hospitality industries poses an immediate threat to organizational performance and viability—an unprecedented situation requiring that the hospitality industry seek and explore a variety of solutions to overcome.

The purpose of this Special Issue is to examine the impact of the organizational climate and well-being-oriented values of the hospitality industry on employees' sustainable behavior.

We welcome articles covering the organizational climate and values in the hospitality industry, including hotels and tourism. We encourage a variety of studies, including but not limited to surveys, case studies, experimental design papers, and big data analysis.
