Engineering, Polish Academy of  
Sciences, Zabrze, Poland

Deadline for manuscript  
submissions:

**31 January 2025**

### Message from the Guest Editors

Sewage sludge is a by-product of wastewater treatment processes, and can pose ecological risks if not managed properly. It is composed of organic and inorganic materials, including pathogens, nutrients, heavy metals, and organic compounds. Therefore, proper sludge management is essential to prevent pollution migration and minimize environmental and human health risks.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Sustainable sewage sludge management;
- Assessment of ecological risk;
- Environmental and health impact assessment;
- Sewage sludge management and application;
- Sewage sludge sustainable disposal methods;
- Protection of the natural environment from secondary contamination with pollutants in sewage sludge.

We look forward to receiving your contributions.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
