Message from the Guest Editors

Dear Colleagues,

The adoption of artificial intelligence and blockchain in the field of healthcare and agriculture is progressing rapidly. Artificial intelligence has been already used in pre-clinical and clinical settings. As far as agriculture is concerned, artificial intelligence, especially deep learning and machine learning, has helped farmers in many ways, such as identifying plant diseases, crop yield prediction, crop and fruit classification. Most importantly, blockchain agriculture enables the traceability of information in the food supply chain to improve food safety. Blockchain's ability to store and manage data creates traceability, which is used to facilitate the development and use of innovations for intelligent farming and index-based agriculture insurance.

In this Special Issue, we aim to collate current research, focusing on applications of blockchain and artificial intelligence on various biomedical and agricultural data. In this Special Issue, original unpublished research articles and reviews are welcomed.

We look forward to receiving your contributions.

Dr. Ali A. Alwan Al-juboori

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
