Message from the Guest Editors

This Issue invites papers on proposing such new methods. Interested areas include, but are not limited to, the following:

- Combined control and economic-oriented systems (e.g., transactive energy systems) for achieving autonomous or distributed power grid operations
- Demonstration of DERs and end-use flexibility to achieve grid modernization and decarbonization of conventional systems and supplies
- Addressing power grid resilience in the realm of contemporary grid components (solar PV, wind, marine renewable energy, etc.) and architecture (microgrids)

Keywords

- transactive energy system
- power system decentralized/distributed systems
- sustainable control methodology

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
