This Special Issue aims at collecting contributions from different fields of study, thus highlighting and discussing the foundations which could guide the research efforts in this area. The need to decarbonize the agrifood sector to meet climate change goals is compounded with considerations of supply chain efficiency, and an increasing interest in circular economy. In this scenario, Industry 4.0 framework provides impetus to sustain the value creation process across and beyond the supply chains, generating a new set of questions and opening up new research directions. Research should thus play the role of unraveling the links between the complexity of food systems and their efficiency, resilience and sustainability.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
