Message from the Guest Editors

Dear Colleagues,

In the context of sustainable construction, emphasis is often placed on advanced technologies, green materials, innovative construction methods, and the substantial benefits arising from them. Attention, however, should also be given to the professionals that practice sustainable construction. This Special Issue concentrates on the ethics of professionals working on sustainable construction projects. As opposed to those working in traditional construction, professionals in sustainable construction must give more consideration to the environmental performance of projects. This also adds an additional ethical requirement to the role of professionals and makes it more challenging for them to achieve a balance between self-interest and the interests of the employer, the profession, and the public. This Special Issue welcomes any type of article that addresses professional ethics in sustainable construction. Please feel free to submit your papers exploring different concepts, research, and practices to this Special Issue. We look forward to your contributions!

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
