submissions:

**closed (31 March 2022)**

### Message from the Guest Editors

Dear Colleagues,

The Special Issue aims to focus on three main aspects of Public Value Capture of Increasing Property Values:

- **Common Framework:** Land and its value play a crucial role for social activities and development. It has to be considered how property in general has been constructed in the law, political philosophy, and constitution of a country, as well as in the development of the theory of location and ground rent.
- **Innovative Tools:** Tools which are used in many countries are: fees and taxes, a “real estate consortium”, a negotiated development, flexible building rights, the urban development or redevelopment measure, interim acquisition and contract models.
- **Allocation of Development Costs and Benefits:** Land values are determined by several factors—i.e., it is a result of both public and private investments and actions. A conceptual delineation of these elements can facilitate the discussion of who should capture what.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
