submissions:

**closed (28 July 2023)**

### Message from the Guest Editors

It is particularly important to study enterprise operations decisions and supply chain management under the background of low carbon emission reduction based on the theories of relevant disciplines. This Special Issue aims to investigate low-carbon operations management in supply chain management. We welcome contributions tackling this broad area of research and include, among others, the following topics:

1. Low-carbon production operations, such as production plan, purchasing, inventory and deliveries.
2. Sustainable supply chain management, including remanufacturing, closed-loop supply chain, and supply chain cooperation and coordination in carbon reduction.
3. Green product design and marketing strategies.
4. The effectiveness of different carbon policies, such as cap-and-trade, carbon taxes and so on.
5. Green technology innovation and adoption in carbon reduction.
6. Carbon trading and carbon financial operations.
7. Policy design for achieving peak carbon dioxide emissions and carbon neutrality goals.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
