Sustainable Electrochemical Materials and Processes

Guest Editors:

Dr. Haihui Joy Jiang

Department of Chemistry and Chemical Biology, Harvard University 12 Oxford Street, Cambridge, MA 02138, USA

Dr. Jeffrey G. Bell

Department of Chemistry, Washington State University, Pullman, WA 99163, USA

Dr. Thomas C. Underwood

Department of Aerospace Engineering and Engineering Mechanics, The University of Texas, Austin, TX 78712, USA

Deadline for manuscript submissions: closed (1 March 2024)

Message from the Guest Editors

Dear Colleagues,

Climate change is causing an increase in floods, drought, wildfires, and hurricanes. Over the past 50 years, climateand weather-related disasters have surged five-fold. By 2050, climate change could cut the world economy by \$23 trillion. Our climate challenge is largely an energy challenge, as energy accounts for over 66% of global greenhouse gas emissions. Industrial processes, such as the Haber–Bosch process (for producing nitrogen fertilizers), alone account for 1.4% of global CO₂ emissions and consume 1% of the world's total energy production. Chemistry and materials science are key to building a sustainable circular economy by utilizing renewable energy, designing zero-waste reactions, maximizing energy efficiencies and lifecycles, and developing functional materials. This Special Issue will include original research in sustainable electrochemistry.

Research articles in this Special Issue will not only demonstrate advancements in developing electrochemical materials and processes, but will show how they contribute to solving energy and climate challenges.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
