1 November 2024

Message from the Guest Editors

Dear Colleagues,

Concerns about the economic, social, and environmental (un)sustainability of conventional global food supply chains have long raised the need for a transition towards more sustainable, just, and resilient food systems.

In recent decades, a variety of potential answers have emerged, though remarkable changes are still being awaited. These answers address all the steps from farm to fork, including sustainable food production, alternative food networks and their supply chains, green food consumption, and the reduction in food loss and food waste.

The overall purpose of this Special Issue is to focus on the different topics related to the sustainability of diverse food supply chains. The aim is to collect and identify international scientific pieces of evidence that contribute to the sustainability transition of food systems.

We welcome both reviews and original research manuscripts (including quantitative and qualitative approaches). If you are uncertain whether your paper fits into the scope of this Special Issue, do not hesitate to get in touch with the Guest Editors.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
