### Message from the Guest Editors

Dear Colleagues,

The importance of sustainability can never be overemphasized in the global fashion and textile industry. From material research, product design and development, supply chain management, marketing and retail strategies, to product consumption and disposal, sustainability is a key consideration throughout the whole supply chain.

In this Special Issue, we would like to provide a platform for researchers to share their research on sustainability from the perspectives of fashion and textile management. Original research articles and reviews are welcome to be submitted to this Special Issue. Research areas may include (but are not limited to) the following:

- Sustainable materials;
- Sustainable design and product development;
- Sustainable supply chain management;
- Sustainable fashion retailing;
- Green marketing/communication;
- Sustainable consumer behavior;
- Recycling and upcycling;
- Innovative technology and sustainability;
- Circular fashion.

We look forward to receiving your contributions.
