Message from the Guest Editors

Dear Colleagues,

Global food production systems reel under pressure of abiotic and biotic stress in a changing climate. In order to feed the growing population with declining arable land and resources, production practices need to be intensified. Sustainable agricultural intensification aims to trade-off the demand for increased yields within a range of socioeconomic and ecological goals.

This Special Issue comprises original papers related to the analysis of different types of agroecosystems, crop production practices, and management strategies (including methodologies such as tools and early-warning systems) which address the challenges of food security, climate change, and resource conservation.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
