Message from the Guest Editors

Fluctuating energy prices can have significant implications for various aspects of sustainable development, including environmental, social, and economic dimensions. The energy market is under immense pressure, with the nominal prices of certain energy resources reaching historic highs, likely resulting in enduring ripple effects. The sharp increase in energy prices may have a significant influence on the sustainable development of energy, the environment, and the economy, particularly in developing economies. Hence, employing cutting-edge technologies and novel approaches for the precise forecasting of energy and commodity prices across different time scales is of paramount significance in the current context.

This Special Issue will focus on the precise forecasting of bulk commodity prices, particularly energy prices, across various time scales within the context of a sustainable energy transition. It will also examine the economic costs and implications arising from fluctuations in energy prices for the transition toward cleaner energy sources. Furthermore, there will be a specific emphasis on the impacts of energy price fluctuations on sustainable development.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
