Message from the Guest Editors

Dear Colleagues,

This Special Issue welcomes papers focusing on the latest knowledge related to water management. We welcome papers from a wide range of studies on surface and groundwater quality, quantity, monitoring, protection, and modeling. Relevant topics include, but are not limited to, the following areas:

- Water resource management in response to climate change;
- Planning, designing, operation, and the optimization of water resource systems;
- Water as the common thread connecting all sustainable development goals;
- Smart water management;
- Ecosystem-based management approaches;
- Water security, sustainability, and resilience;
- A nexus approach to water resource management;
- The integration of flood and drought disaster risk reduction strategies;
- Sustainable water management in the Anthropocene;
- Geopolitical and socio-economic aspects of water resource management;
- Stakeholder involvement in water management;
- Remote sensing, GIS, big data, and artificial intelligence applications for sustainable water management;
- Ecohydrology.
