Mr. Peter Verhoeven

Chair of Logistics, Technical University of Berlin, 10623 Berlin, Germany

Deadline for manuscript submissions:

closed (30 April 2022)

Message from the Guest Editors

Sustainability is playing a steadily increasing role in international logistics and supply chain management. The focus is mostly on ecological aspects. However, the consideration of social sustainability aspects plays an important role in the implementation of a holistic sustainability approach. Social sustainability focuses on people and includes compliance with human rights and ensuring appropriate working conditions.

In the area of sustainable supply chain management, digital solutions are also increasingly being used as tools to increase efficiency and quality. For example, there are various pilot projects in which blockchain technology is used to check working conditions along the supply chain.

This Special Issue seeks to contribute to the discussion about the potentials of digital technologies in LSCM to enhance social sustainability in logistics and supply chain management. Authors are cordially invited to submit original research papers, review articles, and empirical studies to this special issue of Sustainability.

researching modern technologies and their contribution to social sustainability in supply chains.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
