Deadline for manuscript submissions:
closed (31 March 2023)

Message from the Guest Editors

It is believed that watersheds are the best natural division unit for water-related ecological research, the management of water resources and the ecological environment, and the quality of ecological conditions and the severity of pollution, which are important aspects affecting the sustainability of watersheds. Remote sensing technology has increasingly become an important means of watershed ecology and pollution investigation and monitoring. Watershed ecology and pollution remote sensing has become an important aspect of watershed remote sensing science. For watershed ecology and pollution, a series of remote sensing studies on different types of watersheds around the underlying surface, element composition, the model, data source and temporal and spatial scales have important application value for problem discovery and management in the field of watershed sustainability.

All manuscripts should focus on watershed ecology or pollution, remote sensing and sustainability. The relationship between the research theme and sustainability should be discussed in the introduction or discussion of the manuscript.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
