Deadline for manuscript submissions:

**closed (9 November 2023)**

### **Message from the Guest Editors**

It is challenging to manage water resources and related disasters, particularly in ungauged areas. Remote sensing has the advantages of large area coverage and relatively inexpensive and easy collection, helping to compensate for the deficiencies of the traditional monitoring system.

In this Special Issue, we aim to leverage the modernization of hydrological monitoring and the ability to acquire data based on remote sensing, facilitating the evaluation and prediction of hydrological processes and related disasters.

We welcome original research articles and reviews including (but not limited to) the following topics:

- Production of high-resolution water-related remote sensing data.
- Inversion method of hydrological variables based on remote sensing.
- Method of identifying hydrological variables and water-related disasters.
- Correction technology of hydrological remote sensing.
- Real-time prediction of hydrological variables and disasters based on remote sensing.
- Assessment of water resources and disaster risk based on remote sensing.
- New satellites or satellite constellation plans for water resources and disasters.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
