Deadline for manuscript  
submissions:

**closed (30 November 2022)**

### Message from the Guest Editors

In residential buildings in Europe is used around 40% of the total amount of energy produced, of which more than 70% for space heating. Therefore, reducing energy consumption in this sector is constantly gaining importance, especially in the face of the obligations of individual European Union member states in the field of increasing energy efficiency and the use of renewable energy sources (RES).

The aim of this Special Issue is to incorporate works on energy efficiency and/or integration of RES in existing buildings, supported by (if possible): a) calculation of the time of execution of modernization works; b) analysis of difficulties during the implementation of modernization works for users; c) calculation of Simple Pay Back Time (SPBT).

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
