Message from the Guest Editors

This Special Issue will collate papers that present an original contribution to the resident-host relationship literature, with specific emphasis on studies addressing links between these relationships and sustainable tourism development. Papers are sought which focus on addressing and evaluating explanations and predictions of residents' attitudes using varied paradigmatic and methodological approaches. Papers should focus on either theoretical development or application, especially contributing to a greater understanding of outcomes of resident-tourist relationships in the context of sustainable tourism development.

Keywords

- social impacts
- sustainable tourism development
- resident attitudes
