Message from the Guest Editor

Dear Colleagues:

Climate change is one of the most critical issues of our time and its impacts on biodiversity are more evident than ever. Animal and plant species are threatened with extinction while ecosystems are losing resilience, resistance and stability.

This special issue aims to identify current and future scientific trends of simultaneously coping with climate change and biodiversity loss by exploring new tools, innovative approaches under an integrated framework. Research areas of this Special Issue may include (but not limited to) the following:

- mapping the gaps in the climate change – biodiversity nexus
- observed and projected impacts of climate change on biodiversity
- potential impacts of climate change adaptation on biodiversity
- climate change adaptation strategies that serve biodiversity conservation
- integrated climate and biodiversity policy initiatives towards sustainability.

I look forward to receiving your contributions.

Dr. Nefta Votsi

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
