Message from the Guest Editors

Dear Colleagues,

The contents of this Special Issue refer to the main question on “Sustainable Risk Management: How we can manage risks in a responsible manner?”

This subject was selected in response to the uncertainties that make safety decision making very difficult. The possibility of making a wrong decision has particular relevance due to the increasing complexity of all managing aspects characterizing contemporary system. Hence, an approach based on a more holistic perspective allows us to assure a state of resilience and sustainability.

Evidence of the requirement to approach the theme of sustainable risk management is among the difficulties to explain and resolve the problems of health and safety, row materials and power generation.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
