submissions:

closed (31 August 2022)

Message from the Guest Editors

Pursuing sustainability goals means facing real global challenges such as transitioning from fossil fuels, equitable provision of renewable energy, and mitigating global warming and climate change issues. Energy demand is increasing because of population growth and a desire for a better quality of life that involves heating and air conditioning, travel, and consumer goods. Developing and using efficient, cost-effective, and practical solutions to address sustainability of energy supplies is necessary, while also maintaining and advancing life quality. Renewable energy sources (solar, wind, geothermal, biofuel, hydro, etc.) can help meet global energy needs and diminish the negative consequences of climate change and the threat of global warming.

This Special Issue aims to explore sustainability in the context of renewable energy provision to various communities, at different scales.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
