Message from the Guest Editors

Dear Colleagues,

The air transport industry is currently facing a strong challenge to implement sustainability through various initiatives implemented by airlines, airports and service providers at national and international levels. These initiatives are even more challenging to achieve following the recovery from the COVID-19 pandemic, which has caused increased inflationary pressures, increased energy costs and geopolitical changes around the world. At the same time, the air transport industry is a strong facilitator for the mobility of people and goods, including tourism, with over 60% of international tourists arriving at their destination by air. The UN Sustainable Development Goals (SDG), with a vision to be implemented by 2030, have been welcomed by numerous stakeholders of the aviation industry in a bid to effectively address sustainability challenges. In such an intense market environment, it is deemed necessary for air transport actors to invest in remedial solutions to develop in a sustainable manner.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
