

Timber's Green Revolution: Sustainable Construction from Start to Finish

Guest Editor:

Dr. Manuel Carpio

National Centre of Excellence for the Timber Industry of Chile, Pontificia Universidad Católica de Chile, Santiago, Chile

Deadline for manuscript submissions:

31 December 2024

Message from the Guest Editor

There is a growing awareness of the importance of using environmentally sustainable materials in construction. Timber in particular is experiencing a surge in popularity within the construction sector due to its renewable nature and significant social and environmental benefits. To utilize timber sustainably in construction, it is essential to consider the entire value chain of the timber sector, from its initial stages to the finished products. This chain begins with forest management and silviculture, encompassing various aspects related to the growth and development of forests. It extends to forest development, which focuses on the responsible use and conservation of natural resources, ensuring the production of goods and services. The subsequent phase involves the timber industry, where raw materials are processed and transformed into various new products following harvesting and transportation.

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
