Deadline for manuscript  
submissions:

**closed (30 June 2021)**

### Message from the Guest Editor

We are facing a broad range of challenges that claim sustainable choices, and there is growing recognition and awareness that nature can provide viable solutions. For this reason, we are looking with increasing interest at the use of natural materials for constructions. There are several emerging natural materials that appear to be useful and deserve research to fully understand their potentials and exploit their possible applications.

The aim of this Special Issue is to collect and give visibility to the research on natural materials for constructions.

In particular, we welcome papers focusing on:

- mechanical and physical characterization of emerging sustainable natural materials with innovative experimental setups;
- modeling of the mechanical and physical performance of emerging sustainable natural materials;
- the extension of the experimental characterization and modeling at the level of construction elements made by these materials;
- innovative uses of these materials in constructions together with the rediscovery of the traditional ones;
- grading of the materials;
- standardization procedures.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
