Deadline for manuscript  
submissions:  
**closed (30 March 2023)**

Dear Colleagues,

Quantitative science studies using bibliometric, scientometric, or informetric analysis are applied to characterize the structure and research trends of specific scientific fields by applying quantitative methodologies. A comprehensive spectrum of analysis methods can uncover patterns, trends, and key themes in bibliographic data. When augmented with visualization techniques, these patterns can be interpreted, insights obtained, and future research directions formulated.

This SI aims to provide scholars and stakeholders to advance scientific insights on the evolution of safety and sustainability research and to discuss future development paths. The focus is on the application of safety science scientometric (SafeMetrics) methods to support these insights, but narrative review articles are considered as well.

Papers employing state-of-the-art and innovative bibliometric, scientometric, or informetric analysis approaches and focusing on the developments and techniques (e.g., artificial intelligence) in safety engineering design and practice as well as experimental or theoretical research, applied to the above topics, are the main target for submissions to the SI.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
