Message from the Guest Editors

Dear Colleagues,

Sustainable land management in each country is particularly difficult in the current reality of so many threats, e.g., environmental (water and food poisoning, air pollution, etc.), meteorological (climate change, extreme phenomena and global warming, etc.), sanitary (COVID-19 pandemic, etc.), social (overpopulation, excessive emigration, etc.), and security (terrorist attacks, armed conflicts, etc.). In this context, local governments are facing even greater challenges to ensuring a safe, friendly, and equal space for their citizens regardless of their social, material or health status. This is a task that requires high levels of competence and new approaches to crisis management and the use of intelligent tools to support the right decisions. Such innovative tools are offered by smart GIS and geotechnology for space monitoring, including localization of intensity and range of various negative and positive phenomena.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
