Message from the Guest Editors

This Special Issue will comprise a selection of papers addressing the modelling of zero energy districts (nZEDs) for the energy, economic, and environmental analysis of sustainable urban development. Municipalities play a key role in the achievement of the international energy and climate aims. To date, most of the literature has regarded net-zero energy buildings (nZEBs).

This Special Issue has the ambition to propose innovative solutions for social housing districts, where the limited access to energy resources represents a critical condition to guarantee enough comfort to anyone.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
