Message from the Guest Editors

Dear Colleagues,

Sustainable social development (SSD) is the ultimate goal of any society to support its current and future generations. A sustainable society must be a healthy society. Many interventions need to be designed and implemented to achieve this goal. However, policy makers need to identify the interventions with the best value for money under resource constraints. Health economics is a tool to guide the policy decision process, particularly in low and mid-income countries.

This special issue aims to understand what health interventions have been implemented? What are the effectiveness? What are the barriers and enablers of successful implementation to achieve a sustainable society? Therefore, we welcome submissions among, but not limited to the following topics:

- Descriptive analysis of SSD interventions;
- Health services research;
- Socioeconomics related equality in health
- Barriers to the SSD
- Novel eHealth interventions for health promotion
- Policy analysis of SSD initiative
- Any other topics related to SSD and health economics

We look forward to receiving your contributions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
