### Message from the Guest Editor

The promotion of pro-environmental behavior is particularly important in seeking to solve environmental problems and achieve the goals of sustainability. This special issue encourages the submission of articles related to:

- Pro-environmental behavior (in general and for separate type of behaviors)
- Changes in pro-environmental behavior
- Environmental education (information) impact on pro-environmental behavior
- Environmental policy tools implication on pro-environmental behavior
- Cross-culture and cross-generation analysis
- Covid-19 implication on changes in pro-environmental behavior

In this sense, both research papers and review papers on these topics are welcome.
