Message from the Guest Editors

This Special Issue aims to propose a collection of studies that combine the aforementioned concepts, including methodologies and/or case studies on the following topics:

- assessment of sustainable marine developments and activities, including quantification of potential environmental, and socio-economic effects;
- investigation of the interrelationships between social and ecological factors within ecosystem-based assessments;
- the efficiency of protective measures such as mitigation or compensation measures;
- analysis of international or national marine policies and their contribution towards reaching or preventing reaching the aim of sustainable development;
- recommendations to improve on current processes and activities and the potential to lead to an increase the sustainability of our marine environment;
- how bioremediation and blue carbon can be used into the assessment of sustainability of marine activities.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
