Message from the Guest Editors

Dear Colleagues,

We sincerely invite researchers to contribute original research articles dealing with the socio-economic and demographic impacts of climate change in pre-historic, historical, and modern times, which is a topic focusing on human–environment interactions. The related knowledge may have important implications for global and regional sustainability. This Special Issue is going to serve as an interdisciplinary platform for collecting different views and facilitating a constructive debate about the ways in which human–environment interactions can be generalized, contextualized, or even denied—a philosophical issue pertinent to the theoretical underpinnings of environmental humanities. To further facilitate the debate about global and regional sustainability from different perspectives, scholars who agree on the significant impact of climate change on human societies, or who are skeptical about this relationship, are welcome to contribute their related works to this Special Issue. Besides, this Special Issue will publish review articles that help to identify possible future research directions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
