Deadline for manuscript  
submissions:

**closed (10 July 2023)**

### Message from the Guest Editors

Agriculture is facing serious soil problems. Adoption of intensive farming practices with imbalanced application of fertilizers results in reduced crop productivity and crop quality, depletion in soil organic carbon stock, soil compaction, emergence of multi-nutrient deficiencies, and low nutrient use efficiency in different soil–crop situations across the world.

For this Special Issue, we invite to publish articles in the field of agriculture (field to plantation crops) related to the assessment of spatial and temporal distribution of nutrients, development of soil management zones for efficient nutrient use, evaluation of crop responses to nutrient application, development of balanced/integrated nutrient management strategies, development of site-specific nutrient management strategies, enhancement of nutrient use efficiency, identification of genetically/agronomically nutrient efficient genotypes of different crops, and establishment of critical limits of nutrients under different soil–crop conditions, and devising best management practices (BMP) for the nutrients under various soil–crop situations.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
