Message from the Guest Editor

Dear Colleagues,

With the increasing interaction of people flow, logistics, traffic flow, capital flow and information flow among cities, urban flow gradually blurs the boundaries of time and space, and promotes the relative position, correlation and interaction of cities in the regional scope to show new characteristics such as agglomeration and diffusion. As a form of integration with huge flow in a certain region, the flow space of urban agglomeration has become the focus of research on the spatial structure of urban agglomeration. How to identify the structural characteristics of urban agglomeration flow space and reveal its structural deformation and pattern reconstruction caused by the spatial scope of urban agglomeration is also an urgent and complex problem to be solved in the research of urban agglomeration spatial structure.

This Special Issue concentrates on the spatial identification and evolution of urban agglomeration. Both theoretical and applied original papers will be considered. Systematic reviews that combine and summarize the results of the literature on urban agglomeration spatial identification are also welcome.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
