### Message from the Guest Editors

Dear Colleagues,

Energy sufficiency is a concept that resonates throughout today's world. It is a problem that affects not only developing countries, but also advanced economies. We can see its consequences and hear the phrase “energy poverty” more and more often. This, in turn, is related to the affordability of energy, which is slowly but surely moving toward a luxury good. Basically, we have two options for dealing with this problem. The first one consists in increased energy production and the other one in its optimized use (saving). Therefore, research and development in the field of production is an extremely current topic (the adjective “green” is often used in this context, sometimes even unjustifiably). These are the topics covered in this Special Issue of *Sustainability*, which will present the current results of research and development by leading experts in areas such as:

- Energy-saving techniques and technologies;
- New trends and ideas in energy harvesting;
- Power transfer;
- Modeling on energy consumption, generation, or storage.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
