# Sustainability, Resilience and Risk Assessments Enabled by Multiple Criteria Decision Analysis (MCDA)

Guest Editors:

#### Dr. Marco Cinelli

Decision Engineering for Sustalnability and REsilience (DESIRE) Laboratory, Leiden University College (LUC-Office 4.22), Faculty of Governance and Global Affairs, Leiden University, Anna van Buerenplein 301, 2595 DG The Hague, The Netherlands

### Dr. Miłosz Kadziński

Institute of Computing Science, Poznan University of Technology, Piotrowo 2, 60-965 Poznań, Poland

Deadline for manuscript submissions:

closed (26 March 2023)

## **Message from the Guest Editors**

Dear Colleagues,

Multiple criteria evaluation involving numerous pertinent and (sometimes) conflicting factors is the core of **sustainability**, **resilience**, and **risk assessments**. The same is true for the preferences of the stakeholders involved in these complex processes. **Multiple Criteria Decision Analysis (MCDA)** is an excellent methodology to aid them because it offers the tools to **deal with these assessments' complexities**. MCDA aids decision makers in problem structuring, preference elicitation and modeling, and problem-solving by providing the requested decision recommendations (e.g., ranking, sorting, choice).

This Special Issue (SI) aims to gather contributions that show how MCDA can be used to facilitate decision-making processes in sustainability, resilience, and risk assessments.

Find more information (including submission guidelines) here.

# **Message from the Editor-in-Chief**

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
