Message from the Guest Editors

Transportation is a major influencer in reaching sustainability. It can lead to major reductions in our dependence on fossil fuels through the move to electric modes. A move towards shared rides and active modes of transport will reduce the discharge of pollutants. It will also have a major impact on health through the increased share of cycling and walking. At the same time, the road safety impacts of such changes should be monitored and evaluated.

This Special Issue aims to present state-of-the-art research related to recent advances in sustainable transportation and road safety. Topics of interest include, but are not limited to, the following:

- Urban mobility patterns and road safety
- Road safety in a sustainable urban mobility
- Innovative services and the system's safety
- Safety impacts of vehicle automation
- Level of vehicle automation and road safety

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
