Message from the Guest Editors

This Special Issue entitled “Sustainable Organic Materials used in the Construction Sector” covers various subjects related to the production of organic-based sustainable materials and their application in construction activities. Different sources of sustainable organic materials are screened, as well as their application in different construction sectors (buildings, roads, railways, airports, ports, tunnels, bridges), such as but not limited to cement concrete, asphalt concrete, wood, and hybrid materials. Since the use of such materials in civil construction engineering is an emerging field, literature reviews and state-of-art papers are highly appreciated.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
