Message from the Guest Editors

Dear Colleagues,

According to the EU Methane Strategy, methane emissions from agricultural waste and energy account for up to 95% of human-made methane emissions worldwide. Reducing these methane emissions by 50% over the next 30 years could mitigate global temperature change by 0.18 °C by 2050. Biogas and biomethane play a major role in the EU Methane Strategy and have been contributing to methane emission reductions in agricultural and waste sectors for many years.

This Special Issue welcomes reviews, case studies, and original research papers on the following topics of interest, among others:

- Anaerobic digestion of new substrates;
- New digestion processes, improvements or co-digestion strategies;
- Flexible biogas plants;
- Biogas upgrading;
- Biomethane production and use;
- Power-to-gas technologies (involving biogas in any manner);
- Life cycle assessments of biogas production and/or upgrading processes;
- Digestate use, enhancement and/or novel digestate

Special Issue

Production of valuable co-products from biogas or the

- Production of valuable co-products from biogas or the anaerobic digestion process.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
