Message from the Guest Editors

Mountain areas represent a natural, historical-cultural, and economic heritage of which the appropriate management is fundamental in order to promote the sustainable development of these territories and of the whole planet. This topic is an urgent challenge due to the rapid and unsettling anthropic and climatic events happening in the last several decades.

This Special Issue entitled “**Sustainable Development in Mountain Areas**” has the aim of gathering relevant studies about the use and valorization of mountain resources in order to foster the sustainable development of these areas, both in developed and developing countries. The relevance of the studies must go beyond academia and give practical recommendations to facilitate the sustainable development of mountain areas and the setting up of new and green development models.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
